"Bana üzerinde durabileceğim bir yer verin, Dünya'yı yerinden oynatayım" (Akt. Arşimet)

Bir ışınla hayatınızı aydınlatacağız! birleştirdik dekoratif karakter ile teknik rol, bulduk mükemmellik.

Galvanik banyolar, ince yüzeyler, elle fırçalanmış armatürler. Pirinç, bronz, perdahlı, tunç, titanyum, siyah ve beyaz.

Manyetik sistemli kancalar, gömme rozetler, fikstür raydaki sistem, çeşitli sabitleme seçeneklerinden biridir peki ya ampulü değiştirmek istersek? sadece ihtiyacımız var sökün ve yenisini takın.

Sayesinde ışığı değiştirmek hiç bu kadar kolay olmamıştı. güç, yoğunluk, sıcaklık için çok sayıda seçenek ve ışın açısı.

Işık, çılgınlığın üzerinde bir duruş, arasında kağıt gibi bir sınır yansımalar, gölgeler ve renkler.

Teknik kısmın bittiği yerde dekoratif kısım başlar.

"Give me a place to stand on, and I will move the Earth" (cit. Archimedes)

With a ray we will light up your life! We combined the technical role with the ornamental character, we found perfection.

Galvanic baths, fine finishes, hand-brushed luminaires.

Brass, bronze, burnished, gunmetal, titanium, black and white.

Hooks with magnetic systems, recessed rosettes, fixture system on the track is one of the various fixing options and what if we want to replace the bulb? We just need to unscrew it and insert a new one .

Changing the light has never been easier thanks to the numerous options for power, intensity, temperature and beam angle.

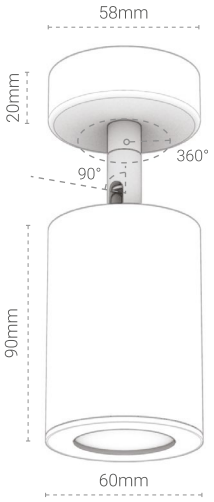

Light, a poise above madness, a papery borderline between reflections, shadows and colors.

Where the technical part ends the decorative one begins.
